## January News

We have spent the new year enjoying some nice weather outside while BBQing and gardening. We have had oranges and lemons we have been picking off our trees as well as herbs, cauliflower, cabbage and carrots. This is such a great time of year to harvest all the things we planted in the fall. We will start planting our spring garden in the next month.

We have been doing a few art projects and as well as learning activities in groups. See the last page for all the details on groups.

# Groups

This month in groups we have been doing learning activities on Galileo, Australian Dingo, President Obama, Stephen Austin, history of mass media, Elephants and Ruth Bader Ginsburg. We have been working on organizing our projects for 2020. Some activities were color by numbers, art projects or physical activities such as going for walks, gardening or playing games. Our residents have accomplished so much this last year and we are enjoying watching their progress!
