Highlights of December

- Enjoying Holiday festivities
- Gingerbread house decorating
- Enjoying the nice weather and working in the garden

Happy Holidays from Blue Sky

We hope everyone enjoyed their holiday season as much as we did. It is such a fun time to enjoy the lights, good food, and festivities.

We took a few drives around the neighborhood to enjoy and lights. Everyone helped with decorating the tree and putting up lights of our own house.

We love how the holiday season brings up fond memories and seems to bring out the best in everyone.

Now that the New Year has begun we have a lot of great plans for new projects and growth for 2017. A few of our plans include a craft and bake sale, farmers market, exploring more counties and expanding our garden. We will keep you updated on our progress!

Blue Sky Gardening

December is not only busy with holidays, but our regular scheduled activities and projects. As always our garden needs work. Our residents have been busy weeding watering and even starting to harvest our garden. The spring is when things will really start producing, but it is fun seeing the fruits of our labors.

Our Crops

- Bell Peppers
- Tomatoes
- Broccoli
- Lettuce
- Red Cabbage
- Carrots

Birthday Celebrations

We had a couple birthday within the week of Christmas and had a great time having an extra reason for more parties. We love any reason to celebrate and this month was non stop parties, good food and fun!

Gingerbread House Decorating

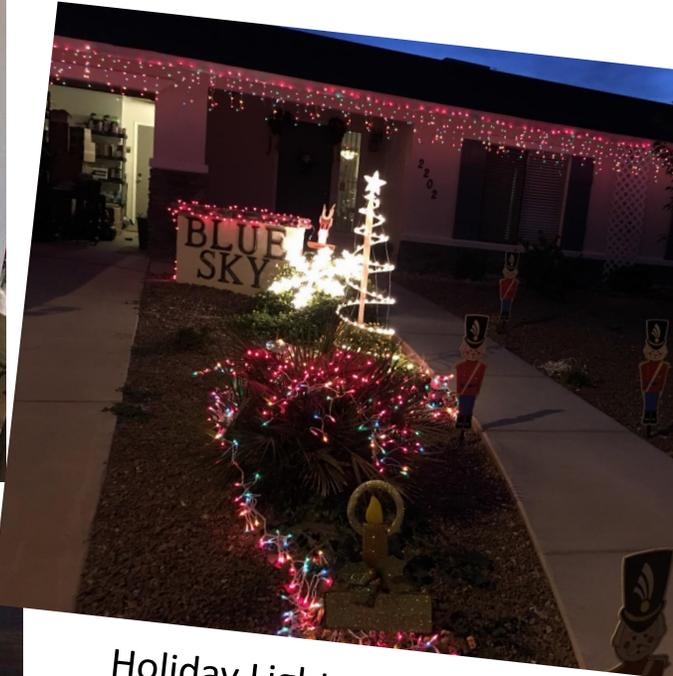

One of the activities that was a big hit this month was Gingerbread house making. We worked together while creating quite the piece of art. It's always fun to hear the discussions that come up about fun memories and traditions while doing these activities.
